DETAILED ACTION

This office action is in response to applicant's communication 1/10/2006.

Currently claims 1-24 are pending and rejected, see below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Pfister (U.S. 4,334,551). Pfister discloses a reusable connector coupling device (as in figure 2a) with a first part and second part (end sections near 110 and 111) with medical lines (120, 134) with seals (127, sheath 147 with skirt 146) and connector (attachment protrusions and groove 110/111), arms (near 139 for example), diaphragm (151) with slit (152) and channels (near numbered arrow 151), a fluid delivery device (132) with needle (138), further it is examiners position that these devices are "snap fit" since they can "snap" into each other for connections and unsealing. The elements disclosed in Pfister are fully capable of satisfying all structural, functional, spatial, and operational limitations in the amended claims, as currently written, and the rejection is made and proper. See rejection discussion below.
